long time has been carefully watched, as its success or failure was sure to affect similar attempts in other cities.

Most of the work in favor of reform has been done by famous Committee of One Hundred. Though all that was expected and desired has not been gained, yet much has been accomplished. Whatever failure there has been can be ascribed more to the indifference there has been can be ascribed more to the indifference of the people than to incompetency in the committee. This was shown in the election last Tuesday, when a large number of the most important offices in the city government were filled. The general result was in favor of reform, but many candidates indorsed by the committee were defeated through apathy among the voters. Only 110.121 votes were cast, a failing off of over 63,000 from the number poled in the Presidential election of 1850. The experience of Philadelphia is similar to that of many another city, and that is that the people become tired very quickly of keeping up their end of the work of reform.

BUTLER HAS HIS USES.

There are times for political chaos and non-descripis, and this seems to be one of them. Governor Butter is a mere accident of evolution and development. He supplies the "missing link" in the political evolution of the State, and if he shall be an instrument for any benefit, we shall recognize the fact with grateful hears.

CONTAINS SOME TRUTH.

CONTAINS SOME CONTAINS COUNT.

From The Hartford Primes (Denk.)

The Republican party, though in a majority in both Houses of Congress, cannot control its own members whon they are called upon to vote upon a revision of the tariff. The views of their members are widely different upon a number of the important schedules in proposed bills. The Republican journals charge upon the Democratic members that they are united when voting upon these tariff schedules, but it is equally true that their own members are not united. Could they be brought to an agreement a bill would speedily be passed.

THE FREE RUM PARTY

THE FREE RUM PARTY.

From The Boston Herald (Ind.)

The Democrats of the New-York Legislature seem to be ambitious to earn for themselves the name of a free rum party. The New-York City and Brooklyn representatives have agreed upon a new excise bill, which, it is said, is sure to go through, removing all restrictions as to liceuse for those cities. It provides that the boards of excise may grant a license to any person who complies with the requirements of the law, without regard to the necessity for or the character of his "linn, hotel or tavern." It like wise makes the licenses transferable, and protects the liquor setters from arrest except upon warrant duly issued and based on affidavit, except upon warrant duly issued and based on affidavit, except upon warrant except would not indicate that the crying need of the metropolis is greater facilities for getting drunk. But the representatives ought to know the needs of their constituents.

The holiday performances of the Boston Ideal Opera Company, at the Fifth Avenue Theatre, yesterday included two familiar and favorite works. cot," at the matinée, and "The Pirates of Penzance," in the evening. The "Mascot" performance was elever throughout, a result more particularly due to the constant presence of Mr. Barmabee, who in the part of Lorenzo was eminently furny and in a way which, though as to its methods it seems very slight, is elaborate, and rich in really original and spontaneous humor. Mr. Frothingham again was telling in the part of Rocco, and the two together were extremely amusing in wild fun

the two together were extremely amasing in what am which was invariably stayed within the limits of propriety and taste.

Mr. Sturgiss made a considerable but easily-won success in the small part of the Physician, modelled upon Mr. Oscar Wilde. Mass Geraldine Ulmar and Mass L'zzie Burton were very satisfactory as Betlena and Famelia, the former singing surprisingly well, and the entire play went with much better movement and spirit than any other recent representation by this company.

GENERAL FOREIGN NEWS.

PROGRAMME OF THE FRENCH MINISTRY. ITS CHIEF FFATURES EXPLAINED BY PRIME MINISTER FERRY.

Paris, Feb. 22.-The new Ministry was gazetted

to-day. In the Chamber of Deputies Prime Minister Ferry explained the programme of the Ministry, and solicited the confidence of the country. He said that the Government's first care would be to satisfy the wish of the Chamber by applying the law of 1834, under which the Princes would be deprived of their military posts. The Government thought that nothing more was necessary for the present. The Republic was not endangered, and in the event of a conspiracy would have ample power to protect itself by rights inherent in all governments, without infringing upon the essential liberties of the people. The Government demanded that measures be taken against the utterance of seditious cries, and against the authors of seditious placards. Irritating questions and fruitless discussions, he said, must be set aside, leaving to the Government the mitiative which belongs to it as a right. Reforms were required in the magistracy. A Military bill and an Habitual Criminals bill were to be introduced. The Budget for 1884 would shortly be presented. M. Ferry said that the Government pro poses to facilitate the execution of pubworks, and to introduce measures lie works, and to introduce measures looking to the organization of a protectorate in Tunis and the reduction of the expenses of the occupation of that country. The foreign policy of the Government, he said, will be peaceful, but not necessarily one of inaction. "Whenever our interests and honor are engaged," he declared, "we must maintain France in the rank to which she is entitled. It is essential to give Europe the spectacle of a Government sure of its future and better armed against factions; of an Administration strong and respected; and of a parliamentary Republic resting upon the French virtues of good sense, labor and love of progress."

M. Jolibois, Bonapartist, gave notice that he would submit an interpellation regarding M. Ferry's statement. atement.

GERMANY'S CONFLICT WITH THE VATICAN. BERLIN, Feb. 22.—The Landiag to-day discussed the estimates of the Ministry of Worship. Herr Windthorst, the leader of the Clerical party, said that the Government was to blame for the conflict with the Vatican, as it has not been in earnest in its negotiations. The Government is not desirous of peace with the Vatican, though the Emperor is in favor of it. Herr Schorlemer affirmed that the State would be forced to make peace with the Roman Curia in order to terminate the expatriation of Catholic communities, which promoted demoralization and prepared the way for the triumph of Social-

Herr de Gessler, Minister of Public Instruction, said he would place no difficulty in the way of religious schools, but only desired to prevent the exercise of certain special influence over the schools. The Government, he stated, had almost entirely removed the sequestration of the meomes of the elergy and pardoned Bishop Melchers. This statement caused general surprise. Tae debate was
